## South Arm

**ID:** 24549  
**State:** Tasmania  
**Area:** 4572 ha  
**Longitude:** 147.531833  
**Latitude:** -42.8685

These components of the Ralphs Bay-Pittwater complex together support well over 1% of the world population of Pied Oystercatcher.

### Globally-important bird populations in this IBA

Common Name	Population	Abundance
Pied Oystercatcher	729 - 1066	individuals

[more detail](#)

### Management considerations

Removal of exotic species and greater control of human disturbance would improve this IBA. The marina proposal for Ralphs Bay (Lauderdale) would destroy large feeding and roosting areas used by 700+ Pied Oystercatchers.
