## Response to Environment Tasmania and Save Ralphs Bay Inc. Questionnaire

Honey Bacon

This is such an important issue and will affect this area in many different ways what ever the decision may be. I believe that the RPDC report will have all of the information that is required to make an informed decision or to be able to ask the community/ government and interested parties for more detail. The Coastal legislation and the effects on the community, traffic plans for the future, infrastructure needs and many more questions need to be addressed and as yet I do not have that information but I look forward to receiving it. I compliment those who have taken the time and effort to be so involved with the future needs of their community.
