Ralphs Bay

Tasmania

Fragile coastline under threat

Ralphs Bay, east of Hobart, is a place treasured by locals and visitors for its quiet, natural beauty and abundant bird life.

The Bay's sweeping sand flats provide homes to thousands of local and migratory birds.

It is an ecosystem of local, national and international significance and vital to the health of the River Derwent.

Ralphs Bay is the proposed site of Tasmania's first 'Gold Coast style' canal housing estate.

The threat to Ralphs Bay is an all too familiar story across Australia's coastline. So too the response; a small community seeking to defend its precious place and lifestyle from short-term profit opportunities and inadequate coastal protection. With its priceless wild beauty, Tasmania's coastline is under increasing development pressure. Sydney-based Walker Corporation proposes to build a 500 home canal estate and marina on the footprint of the Ralphs Bay Conservation Area. Canal estates, already banned in NSW, belong to a time and place long past. In the 21st century, we should know better. Our organisation is working on behalf of thousands

of concerned Australians to save Ralphs Bay, and all its remarkable creatures, for future generations. We believe its enduring values lie in the habitat offered to a rich diversity of flora, fauna and marine species, its recreational pleasures, and sweeping vistas across to Mt. Wellington. We value its tranquil sunsets, its misty mornings and the blasting north westerlies that drive white-capped waves on to its shelly shoreline. To date, we have spent almost three years educating and campaigning to save Ralphs Bay; to protect the feeding ground of the migratory birds who fly to the northern hemisphere and back, the quirky Pied Oystercatchers strutting about on the sand flats,

the critically endangered Spotted Handfish feeding and breeding unseen on the bay's sandy bottom, as well as the microscopic life forms which play a critical role in ecosystem health. We thank you for purchasing this calendar. By this action alone, you will assist us to demonstrate that our coastal bays and water ways are much, much more than a real estate opportunity. Tasmania's bays and beaches belong to no single person, State Government or corporation, they belong to us all and the generations to come. We hope that, if you have never visited Ralphs Bay, this calendar will help paint a picture of its true value. Visit us at www.saveralphsbay.org and, tell your friends.

The critically endangered Spotted Handfish (*Brachionichthys hirsutus*) is only found in the Lower Derwent estuary and related bays, including Ralphs Bay.

The Pied Oystercatcher (*Haematopus longirostris*) lives and breeds along Australia's coastal fringe. Ralphs Bay is home to an estimated 600 Pied Oystercatchers over the course of a year.

The Red-capped Plover (*Charadrius ruficapillus*) is another Ralphs Bay regular.
